CONTINUING EDUCATION DATA

GENERAL INFORMATION

This report presents continuing education course enrolment data in the programmes offered by B.C. school districts, community colleges and provincial institutes. University continuing education enrolment data is not presented in this document.

Continuing education programmes include part-time high school completion and academic upgrading courses, vocational courses, vocational training and skills upgrading courses, general interest and community education courses. The part-time enrolments in college and institute university transfer and career/technical programmes are show in the Management Services publication "B.C. Post-Secondary Enrolment Statistics: 1983/84".

This edition is the sixth report prepared from information collected and processed by the Ministry of Education. It includes data on the school districts for the school year July 1, 1983 to June 30, 1984 and on colleges and institutes for the fiscal year April 1, 1983 to March 31, 1984. In April of 1982 the college information collection and reporting system was changed significantly. Further, editions dated prior to 1979/80 were prepared from data processed by Statistics Canada using a different course/programme classification structure. These changes are particularly important to note if earlier editions of this publication are consulted for comparative/analytical purposes.

Institutions have been encouraged to cooperate with each other and with other community agencies in meeting the learning needs of adults. Institutions and community agencies may share resources to better facilitate the delivery of continuing education programming. Alternatively a local industry or organization may purchase a course from an institution specifically for its own members. Therefore, during 1982/83 school districts were requested to provide course sponsorship information. Classes were categorized as institutional sponsored, co-sponsored, co-sponsored with another institution, and contract services (see CE120 definitions).

Information to be found in this booklet is based entirely on the CE120 Reports submitted by the school districts, actual expenditures, T.V. 27 and PAC reports submitted by colleges and provincial institutes. The Divisions of Data Services and Management Services review these reports prior to processing and printing of the data booklet - with minimal editing the data are published as received by the Ministry.

The definitions of the various data categories and the methods of computing the derived information are the same as those reported in last years report.

To minimize the cost of producing this report many of the tables have been reproduced directly from the appropriate computer printouts, and therefore the format of the tables in this report differs markedly from other editions in this series.
